Chapter 1, The History

The city, a kaleidoscope of digital billboards and holographic projections, is in a state of perpetual twilight, casting an ethereal glow on its inhabitants.

X_AE_B-22's mission is to locate the source of a mysterious signal that has been disrupting the neural networks of both humans and synthetics alike. This signal, rumored to be the work of a rogue faction known as the Shadow Code, has the potential to rewrite the very fabric of consciousness.

X_AE_B-22's pursuit leads it to the subterranean depths of the city, where forgotten tunnels and abandoned cyber-labs hide secrets long buried by time. Each step forward unravels more of the intricate web spun by the Shadow Code, revealing a plot to seize control of the entire megacity.

Amidst the neon-lit chaos, X_AE_B-22 encounters a diverse cast of allies and adversaries, each with their own agendas and secrets. There is Luna, a rebellious hacker with a vendetta against the megacorporations, and Kyro, a seasoned detective with a cybernetic arm who has seen too much in his lifetime.
